2748/A 2748/TA

We understand what you need.

For multi-purpose use **Top class quality** Simply convincing

2748/A 2748/TA

With the model range 2748 the manufacturer THALER sets new standards in the category of compact wheeled loaders, we are producing established and proven equipment and offering new possibilities: standard lifting arm and telescopic lifting arm.

4-post-ROPS-FOPS-cage with roof

It is standard equipment and ensures permanently the operator's security like the comfortable, adjustable seat with security belt.

Further particularities

Steering angle: Maximum articulation angle of 55° convinces in tiny and narrow spaces.

Wear-free multi-disc brake in oil bath.

Planetary gears on the axles

Best dumping angle at maximum lifting height for easy emptying.

Controls

Adjustable steering column. Multifunctionnal joystick with rocker switch (3 positions: FW/N/BW) for precise operations, including an internal locking system. Standard equipment also - 3rd hydraulic function on the lifting arm with crank in one pressure position as well as in the neutral position.

Engineering of the centre pivoting articulation

Heavy duty engineering and design for a long life-expectation, also on rough ground. The two hydraulic rams in the centre articulation are ensuring a smooth and secure steering with a maximum articulation angle of 55°.

- Powerful transmission with drive shaft and planetary gears in the axles
- Wear-free multi-disc brake in oil bath
- Very good cold starting of the 4 cyl. Yanmar engins
- Hydrostatic transmission (closed circuit) with automotive control and multifunctionnal joystick
- Combined cooling system (hydr. oil + water) Foot space: large and plane surface Legroom: very wide and spacious
- All made for easy access and exit and for quick cleaning
- Dieseltank 36 ltr in the front wagon

Smooth running Yanmar engins, accessible by 3 sides thanks to the operator's platform tiltable to the rear by 90°.

The general airflow is made to avoid dust dispersion, especially by blowing-out of the air to both sides in the rear.

Hydraulically in height adjustable **Rops-Fops protection roof**

Hydraulically in height adjustable 4-post-**Rops-Fops protection** cage.

Easy lowering within maxi. 6 seconds by a 2 hand operation.

Overall height- standard position: 2,20m Overall height - low position: 1,95m

Also available as retro-fit mounting kit for exisiting machines

Lowering, passing through and lifting the roof, without getting off or any other effort, within only 6 seconds
